REASONS FOR ALLOWANCE

1. Claims 21-30 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 21 and 29 recite a composite comprising a decorative layer comprising a thermoplastic that is at least partially crosslinked and is selected from the group consisting of ethylene- α -olefin copolymer and an ethylene-styrene interpolymer and wherein the decorative layer is directly adjacent and bonded to a body member comprising a thermoset elastomer rubber that is at least partially crosslinked.

The closest prior art, Honda et al. (US 6,110,546), fails to disclose or render obvious a composite comprising a decorative layer comprising a thermoplastic that is at least partially crosslinked and is selected from the group consisting of ethylene- α -olefin copolymer and an ethylene-styrene interpolymer and wherein the decorative layer is directly adjacent and bonded to a body member comprising a thermoset elastomer rubber that is at least partially crosslinked. Although Honda uses an ethylene- α -olefin copolymer, the compound in Honda is a rubber and not a crosslinked thermoplastic as recited in the claimed invention and ethylene- α -olefin copolymer rubbers differ from ethylene- α -olefin copolymer thermoplastics in a number of ways such as crystallinity, stereospecificity and in their glass transition temperatures.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should
